

APPLIED SYSTEMS CONTROL WORKSHOP

NOVEMBER 18TH, 2024
16:00, ROOM BT1.02

 8, George Barituu Street
BT Building, Floor 1

Dive into the world of industrial system control with this practical workshop designed for students.

Learn the essential principles and applications of control systems used in industry. This workshop will cover the basics of system controlling and real-world applications

WHY ATTEND?

- Learn different control techniques and their applications.
- Gain hands-on experience with real-world industrial control systems.
- if you are an engineering student interested in industrial control systems.
- Prizes!

AGENDA

- Discover the features and capabilities of the Analog Devices industrial platforms.
- Get hands-on experience with tools used for programming and controlling the SWIO Board.

REGISTER BY NOVEMBER 13TH!
