SYLLABUS

1. Data about the program of study

1.1	Institution	The Technical University of Cluj-Napoca
1.2	Faculty	Faculty of Automation and Computer Science
1.3	Department	Automation
1.4	Field of study	Systems Engineering
1.5	Cycle of study	Bachelor of Science
1.6	Program of study/Qualification	Automation and Applied Informatics
1.7	Form of education	Full time
1.8	Subject code	13.00

2. Data about the subject

2.1	Subject name			Chemistry			
2.2	Subject area			Chemistry			
2.3	Course responsible/lecturer			Associate Prof. Amalia Zorica Mesaros, PhD eng. chem.			
2.4	Teachers in charge of seminars			Associate Prof. Amalia Zorica Mesaros, PhD eng. chem.			
2.5 Year of study	I	2.6 Semester	2	2.7 Assessment	Exam	2.8 Subject category	DF DI

3. Estimated total time

3.1 Number of hours per week	3	3.2 of which, course:	3	3.3 applications:	1
3.4 Total hours in the curriculum	42	3.5 of which, course:	28	3.6 applications:	14
Individual study					hours
Manual, lecture material and notes, bibliography					5
Supplementary study in the library, online and in the field					4
Preparation for seminars/laboratory works, homework, reports, portfolios, essays					5
Tutoring					2
Exams and tests					2
Other activities					0

3.7	Total hours of individual study	18
3.8	Total hours per semester	60
3.9	Number of credit points	3

4. Pre-requisites (where appropriate)

4.1	Curriculum	Basic background in Chemistry from High school
4.2	Competence	Basic knowledge and concepts specific to Chemistry, Math, and Physics from High school

5. Requirements (where appropriate)

5.1	For the course	Amphitheatre, Cluj-Napoca
5.2	For the applications	Classrooms, Cluj-Napoca (C408 laboratory, Bd. 103-105 Labor)

6. Specific competences

Professional competences	C1. To use the fundamental knowledge of Chemistry in systems engineering C1.1. To use the basic concepts, theories, and methods for the design, synthesis and analysis of materials to implement/design/solve practical problems regarding systems engineering C1.2. To explain and to argue the answers based on the understanding and application of fundamental concepts from the field of Chemistry and Materials Chemistry.
Cross competences	N.A.

7. Discipline objectives (as results from the *key competences gained*)

7.1	General objective	Developing the competences and knowledge related to General Chemistry useful for systems engineering. Understanding the fundamental concepts and principles common to the various branches of chemistry which deals in a systematic way with the more important elements and the structures, properties and reactions of their compounds. A balance between experiment and theory, between quantitative and qualitative aspects of the course material, and between rigor and simplification is sought.
7.2	Specific objectives	1. Understanding and manipulation of basic concepts in Chemistry and Materials Chemistry combined with Physics and Math. 2. Developing skills and abilities necessary for solving simple and complex problems of Chemistry. 3. Developing skills and abilities for the analysis of chemical phenomena in chemistry which are transposed as problems in the Systems Engineering domain. 4. Laboratory work emphasizes learning basic techniques, learning to manipulate the specific instruments and interpret numerical data, and learning the relationship between experimental measurement and chemical theory through guided, independent work by the student – only for on-site laboratories.

8. Contents

8.1. Lecture (syllabus)		Teaching methods	Notes
1.	Fundamentals – Chemistry and Society. Chemistry - a science at three levels. The branches of Chemistry. Elements and atoms. Compounds. Moles and molar masses. SI units and derived units. Mixtures and solutions. Aqueous solutions. Reaction stoichiometry.		

2.	Atoms: the quantum world. The electronic structure and the periodic table. The periodicity of atomic properties.	Presentation, heuristic conversation, exemplification, problem presentation, teaching exercise, case study, formative evaluation, learning by discovery.	Mainly use the blackboard. The projector used only for short ppt presentation or for presentation of some movies with recorded chemical experiments.
3.	Chemical bonds. Ionic bonds. Covalent bonds: Valence-bond theory, Molecular orbital theory. Metallic bonds. Intermolecular forces.		
4.	Gases. The properties of gases. The gas laws. Molecular motion: diffusion and effusion, the kinetic model of gases. The real gases.		
5.	Liquids and solids. Liquid structure: order in liquids, viscosity and surface tension. Solid structures: classification, molecular, network, metallic solids, unit cells, ionic structures.		
6.	Alloys, liquid crystals, ionic liquids. Semiconductors and ceramic materials. Electronic conduction in solids.		
7.	Thermodynamics: the first law. Systems, states and energy. Enthalpy. The enthalpy of chemical change.		
8.	Thermodynamics: the second and third laws. Entropy. Global changes in entropy. Gibbs free energy.		
9.	Physical equilibria. Phases and phase transition. Solubility. Colligative properties. Binary liquid mixtures. Colloids.		
10.	Chemical equilibria. Reactions at equilibrium. Equilibrium calculations. The response of equilibria to changes in conditions.		
11.	Acids and bases. The nature of acids and bases. Weak acids and bases. The pH of solutions of weak acids and bases. Polyprotic acids and bases.		
12.	Aqueous equilibria. Mixed solutions and buffers. Titrations. Solubility equilibria.		
13.	Chemical kinetics. Reaction rates. Concentration and time. Reaction mechanisms. Models of reactions.		
14.	Electrochemistry. Representing redox reactions. Galvanic cells. Electrolytic cells. Corrosion and protection against corrosion.		

Bibliography

1. P. W. Atkins, L. Jones, *Chemical Principles*, W. H. Freeman & Company, 2007 ISBN-13: 978-0-7167-7355-9
2. M.-L. Ungureşan, D. M. Gligor, *General Chemistry*, Ed. UTPRESS, Cluj-Napoca, 2012, ISBN: 978-973-662-707-1

8.2. Applications/Seminars		Teaching methods	Notes
1.	Laboratory safely rules / Determination of the acetic acid concentration by titration – 2hrs	Didactic and experimental proof, didactic exercise, conversation,	Use of white/ magnetic board, computers and computer
2.	Acids and bases (pH and pOH) -2hrs		
3.	Hydrates: determining the chemical formula using experimental data -2 hrs		

4.	Calorimetry 2 hrs	observation and analysis, individual and team work	programs for data analysis.
5.	Fe_3O_4 (magnetite) – wet chemical synthesis / ZnO - nanoparticles versus thin films -chemical synthesis 2 hrs		
6.	Corrosion and protection against corrosion 2 hrs		
7.	Laboratory test / Brief review before final exam 2 hrs		

Bibliography

1. A. Mesaroş, L. Bolunduţ, M.-L. Ungureşan, Experimente de Chimie Generală, Ed. Galaxia Gutenberg, Colecţia Tehne 5, ISBN: 978-973-141-228-3, 2010, pg. 197.
2. L. Bolunduţ, A. Mesaroş, M.-L. Ungureşan, Electrochimia prin experimente, Ed. Galaxia Gutenberg, Colecţia Tehne 1, 2009, pg. 110.
3. M.-L. Ungureşan, L. Jantschi, D. M. Gligor, Aplicaţii Educaţionale de Chimie pe Calculator, Ed. Mediamira, Cluj-Napoca, 2004.
4. On-line references: http://mihaela.academicdirect.ro/free/Indrumator_laborator.pdf

9. Bridging course contents with the expectations of the representatives of the community, professional associations and employers in the field

The course content and the acquired skills are in agreement with the expectations of the professional organizations and the employers in the field, where the students carry out the internship stages and/or occupy a job, and the expectations of the national organization for quality assurance (ARACIS).

10. Evaluation

Activity type	10.1 Assessment criteria	10.2 Assessment methods	10.3 Weight in the final grade
Course	The level of acquired theoretical knowledge and practical skills, logical coherence, skills of operating with acquired knowledge in individual complex activities.	Evaluation – written exam (theory and problems) – 2 hours	C = 80 %
Laboratory	The level of acquired abilities	- Continuous formative evaluation; - Seminary individual work (30 min)	A = 20 %
10.4 Minimum standard of performance			
$C \geq 5$ and $A \geq 5$			

Date of filling in 09/2022

Course responsible
Associate Prof. Amalia Zorica MESAROȘ, PhD eng. chem

Teachers in charge of seminars
Associate Prof. Amalia Zorica MESAROȘ, PhD eng. chem

Date of approval in the department

Head of department
Prof. Honoriu VĂLEAN, PhD eng
