

Syllabus

1. Data about the program of study

| | |
|------------------------------------|----------------------------------------------|
| 1.1 Institution | Technical University of Cluj-Napoca |
| 1.2 Faculty | Automation and Computer Science |
| 1.3 Department | Automation |
| 1.4 Field of study | Systems Engineering |
| 1.5 Cycle of study | Bachelor of Science |
| 1.6 Program of study/Qualification | Automation and Applied Informatics (English) |
| 1.7 Form of education | Full time |
| 1.8 Codul disciplinei | 44.00 |

2. Data about the subject

| | | | | | |
|----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|---|------------------------|-----|
| 2.1 Subject name | Practical Work in the Domain of Study | | | | |
| 2.2 Course responsible/lecturer | Assoc. prof. dr. eng. Petru Dobra | | | | |
| 2.3 Teachers in charge of applications | Internship supervisors appointed by the faculty: Assoc. prof. dr. eng. Petru Dobra Assoc. prof. dr. eng. Vlad Muresan Assist. prof. dr. eng. Ioan Valentin Sita | | | | |
| 2.4 Year of study | 3 | 2.5 Semester | 1 | 2.6 Assessment (E/C/V) | V |
| 2.7 Type of subject | DF – fundamental, DID – in the field, DS – specialty, DC – complementary | | | | DID |
| | DI – compulsory, DO – elective, Dfac – optional | | | | DI |

3. Estimated total time

| | | | | | | | | | | |
|--------------------------------------------------------------------------------------|----|-----------|--------|---|---------|---|------------|---|---------|-----|
| 3.1 Number of hours per week | 15 | of which: | Course | - | Seminar | - | Laboratory | - | Project | 15 |
| 3.2 Number of hours per semester | 90 | of which: | course | - | Seminar | - | Laboratory | - | Project | 90 |
| 3.3 Individual study | | | | | | | | | | |
| (a) Manual, lecture material and notes, bibliography | | | | | | | | | | |
| (b) Supplementary study in the library, online and in the field | | | | | | | | | | |
| (c) Preparation for seminars/laboratory works, homework, reports, portfolios, essays | | | | | | | | | | |
| (d) Tutoring | | | | | | | | | | |
| (e) Exams and tests | | | | | | | | | | |
| (f) Other activities: | | | | | | | | | | 10 |
| 3.4 Total hours of individual study (sum of (3.3(a)...3.3(f))) | | | | | | | | | | 10 |
| 3.5 Total hours per semester (3.2+3.4) | | | | | | | | | | 100 |
| 3.6 Number of credit points | | | | | | | | | | 4 |

4. Pre-requisites (where appropriate)

| | |
|----------------|-----|
| 4.1 Curriculum | N/A |
| 4.2 Competence | N/A |

5. Requirements (where appropriate)

| | |
|---------------------------|-----|
| 5.1. For the course | N/A |
| 5.2. For the applications | N/A |

6. Specific competences

| | |
|------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 6.1 Professional competences | <p>C2 – Operating with basic concepts of computer science, information technology and communication</p> <p>C2.1 – Describing the structure and operation of computer systems, communication networks and their applications in systems engineering using the concepts of programming languages, software environments and technologies, software engineering and specific tools (algorithms, diagrams, models, protocols, etc.).</p> <p>C2.2 – Well-grounded usage of concepts from informatics and computer technology in solving well defined problems of system engineering and in</p> |
|------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

| | |
|-----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | <p>applications requiring the use 2/3 of hardware or software in industrial systems or information technology systems.</p> <p>C2.3 – Solving common problems of systems engineering using the computer science and information technology concepts for the use of dedicated software tools and computer aided design (CAD) and for the adaptation and extension of these.</p> <p>C2.4 – Selection and evaluation, as a user, of dedicated software and computer aided design (CAD) tools for applications in systems engineering, computers, information technology and communications.</p> <p>o C2.5 – Using hardware - software code sign and software engineering as development methodologies, including the system level modelling</p> |
| 6.2 Cross competences | <p>CT1 - Honorable, responsible, ethical behavior in the spirit of the law to ensure the reputation of the profession</p> <p>CT2 - Identifying, describing and conducting processes in the projects management field, assuming different roles inside the team and clearly and concisely describing, verbally or in writing, in Romanian and in an international language, the results from the activity field. (2 credits)</p> |

7. Course objectives

| | |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 7.1 General objective | Application of fundamental and applied knowledge gained in the projects development within a specialized company or research team (theme set by the project manager) |
| 7.2 Specific objectives | <p>Acquaintance and student involvement in every development stage of a hardware / software / communication project and connected aspects of design activities:</p> <ul style="list-style-type: none"> - Design, implementation, testing and validation of the project - Preparation of documentations, technical reports - Team work and communication skills - Project management activities |

8. Contents

| 8.1 Lecture | No.hours | Teaching methods | Notes |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|------------------|-------|
| - | | | |
| 8.2 Applications – Seminars/Laboratory/Project | | | |
| <ul style="list-style-type: none"> - analysis of the product - preparation of the project specifications - implementation and deployment of the hardware or software system - product testing and validation - product documenting | | N/A | |
| <p>Bibliography</p> <p>For the project development, the draft bibliography is the one recommended by the project leader from the company or by the research team at which the implementation is performed and the one resulted in the documenting phase.</p> | | | |

9. Bridging course contents with the expectations of the representatives of the community, professional associations and employers in the field

| |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>This discipline provides education and training of the students at the workplace site, with benefits for both sides. Students are familiarized with the working and professional requirements needed to work in a company, and companies have the opportunity to shape students to facilitate their employment after graduation (to reduce training expenses / training). Also it aims to increase cohesion between academia and employment in a priority area in terms of national and European level in order to improve the skills of employees and to prepare and maintain them in the labor market in a particularly dynamic and competitive domain (mainly existing competition with Eastern European countries and Asia - India and China).</p> |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

10. Evaluation

| Activity type | Assessment criteria | Assessment methods | Weight in the final grade |
|------------------------------------------------------------------------------------------------------------|----------------------------------------------------|--------------------------------------------------------|---------------------------|
| Course | N/A | N/A | N/A |
| Project | Attendance (min 100 h), activity, tutor assessment | Colloquy; Face-to-face evaluation; on-line evaluation; | 100% |
| Minimum standard of performance: Development of a hardware / software / communication engineering project. | | | |

| Date of filling in: | | Title Firstname NAME | Signature |
|---------------------|-------------|-------------------------------------------|-----------|
| | Course | Assoc. prof. dr. eng. Petru Dobra | |
| | Aplications | Assoc. prof. dr. eng. Petru Dobra | |
| | | Assoc. prof. dr. eng. Vlad Muresan | |
| | | Assist. prof. dr. eng. Ioan Valentin Sita | |
| | | | |
