SYLLABUS

1. Data about the program of study

| 1.1 Institution | The Technical University of Cluj-Napoca |
|------------------------------------|---|
| 1.2 Faculty | Faculty of Automation and Computer Science |
| 1.3 Department | Computer Science |
| 1.4 Field of study | Computer Science and Information Technology |
| 1.5 Cycle of study | Bachelor of Science |
| 1.6 Program of study/Qualification | Computer science/ Engineer |
| 1.7 Form of education | Full time |
| 1.8 Subject code | 30. |

2. Data about the subject

| 2.1 Subject name | | | Design with Microprocessors | | | | |
|---|---------|--|-----------------------------|---|-----------------------|----|--|
| 2.2 Course responsible/l | ecturer | r Prof. dr. ing. Radu Danescu – <u>radu.danescu@cs.utcluj.ro</u> | | | | | |
| 2.3 Teachers in charge or laboratory/ project | f semin | inars/ Conf.dr.ing. Mihai Negru – <u>Mihai.Negru@cs.utcluj.ro</u> S.I. dr. ing. Razvan Itu - <u>Razvan.Itu@cs.utcluj.ro</u> | | | | | |
| 2.4 Year of study | ш | 2.5 Sem | | 2.6 Type of assessment (E - exam. C - colloquium. V - | | | |
| DF – fundamer | | ntală, DD – în domeniu, DS – de specialitate, DC – complementară | | | DD | | |
| 2.7 Subject category | DI – I | mpusă, D | Op – opț | ionald | ă, DFac – facultativă | DI | |

3. Estimated total time

| 3.1 Number of hours per week | 4 | of which: | Course | 2 | Seminars | | Laboratory | 1 | Project | 1 |
|--|---------|-------------|---------|----|----------|--|------------|-----|---------|----|
| 3.2 Number of hours per | 56 | of which: | Course | 28 | Cominara | | Laboratory | 1.4 | Droject | 14 |
| semester | 50 | or which: | Course | 28 | Seminars | | Laboratory | 14 | Project | 14 |
| 3.3 Individual study: | | | | | | | | | | |
| (a) Manual, lecture materia | l and r | otes, bibli | ography | | | | | | | 23 |
| (b) Supplementary study in the library, online and in the field | | | | | | | 14 | | | |
| (c) Preparation for seminars/laboratory works, homework, reports, portfolios, essays | | | | | | | 28 | | | |
| (d) Tutoring | | | | | | | | 0 | | |
| (e) Exams and tests | | | | | | | 4 | | | |
| (f) Other activities: | | | | | | | 0 | | | |
| 3.4 Total hours of individual study (suma (3.3(a)3.3(f))) 69 | | | | | | | | | | |
| 3.5 Total hours per semester (3.2+3.4) 125 | | | | | | | | | | |
| 3.6 Number of credit points 5 | | | | | | | | | | |

4. Pre-requisites (where appropriate)

| 4.1 Curriculum | Computer Architecture, Computer Programming |
|----------------|--|
| 4.2 Competence | Hardware design, Assembly language programming, C language programming |

5. Requirements (where appropriate)

| 5.1. For the course | Black-board/ White-board, projector, computer |
|---------------------------|--|
| 5.2. For the applications | Computer, Atmel Studio, Arduino IDE, Arduino & RPi development boards, |
| | Pmods and several other components, modules, sensors etc. |

6. Specific competence

| 6.1 Professional competences | C2 – Designing hardware, software and communication components (2 credits) C2.1 - Describing the structure and operation of hardware, software and |
|------------------------------|---|
| | communication components |
| | C2.2 - Explaining the role, interaction and operation of hardware, software and |
| | communication components |
| | C2.3 - Construction of hardware and software components of computing |
| | systems using design methods, languages, algorithms, data structures, |

| | protocols and technologies |
|-----------------------|---|
| | C2.4 - Metric based evaluation of functional and non-functional characteristics |
| | of computing systems |
| | C2.5 - Implementation of hardware, software and communication components |
| | C5 - Designing, managing the lifetime cycle, integrating and ensuring the |
| | integrity of hardware, software and communication systems (3 credits) |
| | C5.1 - Specifying the relevant criteria regarding the lifetime cycle, quality, |
| | security and computing system's interaction with the environment and human |
| | operator |
| | C5.2 - Using interdisciplinary knowledge for adapting an information system to |
| | application domain requirements |
| | C5.3 - Using fundamental principles and methods for security, reliability and |
| | usability assurance of computing systems |
| | C5.4 - Adequate utilization of quality, safety and security standards in |
| | information processing |
| | C5.5 - Realization of a project including problem identification and analysis, |
| | design and development, while proving the understanding of the basic quality |
| | needs and requirements |
| 6.2 Cross competences | N/A |

7. Discipline objective (as results from the key competences gained)

| 7.1 General objective | Knowledge, understanding and use of concepts like microprocessor/ microcontroller, bus, memory system, data transfer methods, interface circuits and peripheral devices interfacing, analysis and design of microprocessor systems. |
|-------------------------|--|
| 7.2 Specific objectives | To achieve the main objective, specific objectives are pursued: Knowledge of microprocessors and microcontrollers features and capabilities: hardware capabilities, instruction set architecture, assembly language, and programming solutions. Knowledge of hardware components used with the microprocessors: electrical and logical characteristics, connection modes. Development of skills to find solutions based on microprocessors or microcontrollers for real problems with average complexity. Acquaintance with microcontroller development boards and their software programming tools. |

8. Contents

| 8.1 Lectures | Hours | Teaching methods | Notes |
|---|------------|--------------------------|-------|
| Lecture Overview. Introduction to MP based systems (AVR MCU family) | | | |
| AVR registers and instructions | 2 | | |
| AVR I/O ports and interrupts | 2 | | |
| Input/output and interrupts for Arduino systems | 2 | Oral, blackboard and | |
| AVR timers. Timing events with Arduino | 2 | multimedia, | |
| Serial data communication. Serial data transfer with Arduino | 2 | interactive teaching | |
| Analog signals processing | 2 | style, consultations, | |
| Microcontroller based applications: usage of sensors | 2 | involvement of | |
| Microcontroller based applications: usage of actuators | | students in research / | |
| Introduction to the 8086 microprocessor family | 2 | design. | |
| I/O transfer | 2 | | |
| 8086 – the interrupt system | 2 | | |
| 8086 – memory interfacing | 2 | | |
| DRAM memories. The DMA transfer | 2 | | |

| 8.2 Applications – Seminars/Laboratory/Project | Hours | Teaching methods | Notes |
|--|-------|---|-------|
| Laboratory | | | • |
| Introduction to the Arduino boards. | 1 | | |
| Applications with simple I/O modules | 1 | Presentation on the | |
| Working with the LCD shield and the interrupt system | 1 | blackboard, | |
| Usage of timers | 1 | experiments on | |
| Communication interfaces | 1 | microcontroller | |
| Digital sensors. Analogue keypad | 1 | development boards | |
| Analogue signals processing. | 1 | (Arduino, Raspberry | |
| Project | • | PI, peripherals, | |
| Project specification | 1 | sensors), use of specialized IDE design | |
| Study of the required technologies | 1 | tools (Arduino IDE, | |
| Logic design of the solution. | 1 | Atmel studio), | |
| Implementation of the solution. | 1 | involvement of | |
| Implementation of the solution. | 1 | students in research / | |
| Optimization, testing and validation. | 1 | design. | |
| Project assessment. | 1 | | |
| Bibliography | | | |

9. Bridging course contents with the expectations of the representatives of the community, professional associations and employers in the field

The course is in the Computer and Information Technology field. Its contents combine fundamentals with specific aspects of the used hardware and software tools, accustoming students with the design principles for microprocessor based systems. The course content was discussed with other universities in the country and abroad, and in conjunction with products /development tools offered by companies in Romania, Europe and the USA (e.g. Digilent, Atmel, Arduino, RaspberyPi) and is rated by the Romanian government agencies (CNEAA and ARACIS).

10. Evaluation

| Activity type | Assessment criteria | Assessment methods | Weight in the final grade |
|-----------------------|--|---|------------------------------|
| Course | Testing theoretical knowledge and problem solving skills | Onsite: Written exam Online: Test over Moodle/MS Teams audio-video (or equivalent software), oral (shared screen / audio / video) | 50 % |
| Seminar | | | |
| Laboratory Project | Practical skills for problem solving and implementation of specific problems for applications design. Attendance and activity | Continuous evaluation of the laboratory work, continuous and final evaluation of the project | 50 % |

Modeling and implementation of typical engineering problems using the theoretical models and applicative tools

specific to the domain. Grade computation: 25% laboratory + 25% project + 50% final exam Conditions for participating in the final exam: Laboratory \geq 5, Project \geq 5 Conditions for passing: final exam \geq 5
