## **SYLLABUS**

#### 1. Data about the program of study

1.1 Institution	The Technical University of Cluj-Napoca
1.2 Faculty	Faculty of Automation and Computer Science
1.3 Department	Computer Science
1.4 Field of study	Computer Science and Information Technology
1.5 Cycle of study	Bachelor of Science
1.6 Program of study/Qualification	Computer science/ Engineer
1.7 Form of education	Full time
1.8 Subject code	48.2

#### 2. Data about the subject

2.1 Subject name			Translator design			
2.2 Course responsible/lee	cture	r	Assoc.prof. dr. eng. Emil Şt. Chifu – emil.chifu@cs.utcluj.ro			
2.3 Teachers in charge of a laboratory/ project	semir	nars/	Assoc.prof. dr. eng. Emil Şt. Chifu – <u>emil.chifu@cs.utcluj.ro</u> Ing. Cristina Mihai Ing. Cosmina Radu			
2.4 Year of study	IV	2.5 Sem	ester	1	2.6 Type of assessment (E - exam, C - colloquium, V - verification)	E
DF – fundame		fundamen	ntală, DD	) — în (	domeniu, DS – de specialitate, DC – complementară	DS
2.7 Subject Category	DI – I.	mpusă, D	Op – opț	ional	ă, DFac – facultativă	DOp

#### 3. Estimated total time

3.1 Number of hours per week	5	of which:	Course	2	Seminars		Laboratory	2	Project	1
3.2 Number of hours per semester	70	of which:	Course	28	Seminars		Laboratory	28	Project	14
3.3 Individual study:										
(a) Manual, lecture materia	l and n	iotes, bibli	ography							25
(b) Supplementary study in	the lib	rary, onlir	ne and in	the f	ield					15
(c) Preparation for seminar	s/labor	atory wor	ks, home	work	, reports, p	ortfo	lios, essays			27
(d) Tutoring										10
(e) Exams and tests							3			
(f) Other activities:						0				
3.4 Total hours of individual study (suma (3.3(a)3.3(f))) 80										
3.5 Total hours per semester (3.2+3.4) 150										
3.6 Number of credit points 6										

#### 4. Pre-requisites (where appropriate)

4.1 Curriculum	Formal Languages and Translators, Computer Programming, Data Structures and Algorithms
4.2 Competence	<ul> <li>Basic knowledge of programming and data structures (preferably in the C and Java languages)</li> <li>Concepts of generative grammars and formal languages</li> <li>To know the basic principles in the design of interpretors and translators for languages artificial</li> <li>Basic knowledge of relational databases and web applications</li> </ul>

### 5. Requirements (where appropriate)

5.1. For the course	N/A
5.2. For the applications	Computers, specific software

#### 6. Specific competence

6.1 Professional competences	<b>C4</b> - Improving the performances of the hardware, software and communication
------------------------------	--

	systems (2 credits)
	<b>C4.1</b> - Identifying and describing the defining elements of the performances of the
	hardware, software and communication systems
	C4.2 - Explaining the interaction of the factors that determine the performances of
	the hardware, software and communication systems
	C4.3 - Applying the fundamental methods and principles for increasing the
	performances of the hardware, software and communication systems
	C4.4 - Choosing the criteria and evaluation methods of the performances of the
	hardware, software and communication systems
	C4.5 - Developing professional solutions for hardware, software and
	communication systems based on performance optimization
	C5 - Designing, managing the lifetime cycle, integrating and ensuring the integrity of
	hardware, software and communication systems (2 credits)
	C5.1 - Specifying the relevant criteria regarding the lifetime cycle, quality, security
	and the computing system's interaction with the environment and the human
	operator
	C5.2 - Using interdisciplinary knowledge for adapting the computing system to the
	specific requirements of the application field
	<b>C5.3</b> - Using fundamental principles and methods for ensuring the security, the safety
	and ease of exploitation of the computing systems
	<b>C5.4</b> - Proper utilization of the quality, safety and security standards in the field of information processing
	<b>C5.5</b> - Creating a project including the problem's identification and analysis, its design
	and development, also proving an understanding of the basic quality requirements
	<b>C6</b> - Designing intelligent systems (1 credit)
	<b>C6.1</b> - Describing the components of intelligent systems
	C6.2 - Using domain-specific tools for explaining and understanding the functioning
	of intelligent systems
	C6.3 - Applying the fundamental methods and principles
	for specifying solutions for typical problems using intelligent systems
	C6.4 - Choosing the criteria and evaluation methods for the quality, performances and
	limitations of intelligent systems
	C6.5 - Developing and implementing professional projects for intelligent systems
6.2 Cross competences	N/A

## 7. Discipline objective (as results from the key competences gained)

7.1 General objective	• To know the phases of programming language translators: lexical analysis,			
		syntactic analysis, and code generation.		
	•	To master the basic and some advanced concepts of Natural Language		
		Processing.		
7.2 Specific objectives	•	To know the classes of languages for which efficient translators and		
		interpreters can be implemented.		
	•	To know the rules for processing typical statements for interpreters.		
	•	By using the Prolog language, to build DCG parsers for natural language.		
	•	By using the NLTK toolkit, to build semantic interpreters for natural language.		
	•	To do liveness analysis for programming languages.		

### 8. Contents

8.1 Lectures	Hours	Teaching methods	Notes
Descriptive tools: extended Backus-Naur form.	2	Online:	
Regular grammars and finite automata: finite automata, state	2	- Online on the Teams	
diagrams and regular expressions.	Z	platform	
Context-free grammars and pushdown auromata: examples.	2	presented on slides

# 9. Bridging course contents with the expectations of the representatives of the community, professional associations and employers in the field

It is a specialty course in Computer Science, its syllabus being both classical and modern. It teaches the students with the principles of efficient design and implementation of interpreters and translators for artificial languages. The syllabus of the course has been discussed with other important universities and companies from Romania, Europe, and USA. This syllabus has been evaluated by Romanian governmental agencies (CNEAA and ARAIS).

#### 10. Evaluation

Activity type	Assessment criteria	Assessment methods	Weight in the final grade
Lectures	- Problem-solving skills - Attendance, Activity	<ul> <li>Online:</li> <li>Gradual evaluation during the online lectures, based on a dialog with the students during the lectures</li> <li>There is an online consultation hour meeting before the exam, during which bonuses for the final exam are granted</li> <li>The final exam is oral, as an online meeting on the Teams platform</li> <li>Onsite:</li> <li>Gradual evaluation during the lectures, based on a dialog with the students and their activity at the blackboard during the lectures</li> <li>There are consultation hours before the exam, during which bonuses for the final exam are granted</li> <li>There are consultation hours before the exam, during which bonuses for the final exam are granted</li> <li>The final exam is a written exam</li> </ul>	44%
Laboratory	- Problem-solving skills	Lab works:	
Project	- Attendance, Activity	Online: - Gradual evaluation of the activity of students, at each lab meeting - Bonuses for the final exam are granted Onsite:	35%
		<ul> <li>Gradual evaluation of the activity of students, at each lab meeting</li> <li>Bonuses for the final exam are granted</li> <li>Project lab meetings:</li> </ul>	
		Online:	
		<ul> <li>Gradual evaluation of the activity of students, at each project lab meeting</li> <li>Onsite:</li> </ul>	21%
		<ul> <li>Gradual evaluation of the activity of students, at each project lab meeting</li> </ul>	
Minimum standard	l of performance:	· · · · · · · · · · · · · · · · · · ·	

Modelling typical engineering problems using the domain specific formal apparatus.

Grade calculus: 35% lab + 21% project + 44% final exam Conditions for participating in the final exam: Lab  $\ge 5$ Conditions for promotion: grade  $\ge 5$
