Syllabus

1. Data about the program of study

1.1 Institution	Technical University of Cluj-Napoca
1.2 Faculty	Automation and Computer Science
1.3 Departament	Automation
1.4 Field of study	Systems Engineering
1.5 Cycle of study	Bachelor of Science
1.6 Program of study/Qualification	Automation and Applied Informatics (English)
1.7 Form of education	Full time
1.8 Codul disciplinei	50.20

2. Data about the subject

2.1 Subject name	Computer Networks					
2.2 Course responsible/led	turer Lecturer Dr. Eng. Ioan Valentin Sita – Valentin.Sita@aut.utcluj.ro					
2.3 Teachers in charge of a	applic	cations Lecturer Dr. Eng. Ioan Valentin Sita – <u>Valentin.Sita@aut.utcluj.ro</u>				
2.4 Year of study	4	er	1	2.6 Assessment (E/C/V)	С	
2.7 Turne of subject	DF — j	DF – fundamental, DD – in the field, DS – specialty, DC – complementary DD				DD
2.7 Type of subject	DI – c	DI – compulsory, DO – elective, Dfac – optional DO				

3. Estimated total time

3.1 Number of hours per week	4	of which:	Course	2	Seminar	0	Laboratory	2	Project	0
3.2 Number of hours per semester	56	of which:	course	28	Seminar	0	Laboratory	28	Project	0
3.3 Individual study										
(a) Manual, lecture material and notes, bibliography								14		
(b) Supplementary study in the library, online and in the field									14	
(c) Preparation for seminars/laboratory works, homework, reports, portfolios, essays								11		
(d) Tutoring								2		
(e) Exams and tests								3		
(f) Other activities:								0		
3.4 Total hours of individual study (sum of (3.3(a)3.3(f))) 44										
3.5 Total hours per semester (3.2+3.4) 100										
3.6 Number of credit points 4										

4. Pre-requisites (where appropriate)

4.1 Curriculum	Control Engineering, Systems Theory, Process Modeling
4.2 Competence	Solve common problems in systems engineering by identifying the
	techniques, principles, and applying appropriate methods of mathematics
	with emphasis on numerical calculation methods.

5. Requirements (where appropriate)

5.1. For the course	N/A
5.2. For the applications	Mandatory attendance

6. Specific competences

6.1 Professional competences	Using automation fundamentals, methods of modeling, simulation,
	identification and analysis processes, computer aided design techniques.
6.2 Cross competences	N/A

7. Course objectives

7.1 General objective	• To design and implement human-machine interfaces in different
	programming environments
7.2 Specific objectives	 To use the mechanisms offered by different development environments for designing user interfaces. To use different tools for designing complex application interfaces.

8. Contents

8. Contents	No hours	Tooching mothods	Notos			
8.1 Lecture Introduction. Historical Shield. Graphical user interfaces.	No.hours 2	Teaching methods	Notes			
Principles of realization of human-machine interfaces I.	2					
	2					
Feedbak. Predictability. Transparency. Error tolerance, etc.						
Principles of realization of human-machine interfaces II.	2					
Standardization. Open standards. Design of human-machine interfaces. User profiles. Utility.	-					
	2					
Compliance with user requirements.	2					
Specific problems I. Hardware. Input devices. Output devices.	2					
Specific problems II. Software. Interactive schemes. Error	2					
messages. Response time.		Teaching using				
Specific problems III. Web. Design of human-machine interfaces	2	laptop and				
in web context. Compatibility of web pages. Cookies.	2	projector,				
Information security.		interactive course,				
Realization of human machine graphical interfaces. User	2	debate / or online				
interfaces. Specific controls. Specific types of applications.		on Teams platform				
Examples of environments for the development of human-	2					
machine interfaces for industrial processes. OpenGL, VRTool,	2					
etc.						
WinCC development environment I. Fields of application. Basic	2					
functions.						
Development environment WinCC II. Libraries.	2					
Development environment WinCC III. Link with the description	2					
language of AP STEP7.						
Designing user interfaces using WinCC I.	2					
Designing user interfaces using WinCC II. Bibliography	2

9. Bridging course contents with the expectations of the representatives of the community, professional associations and employers in the field

The topics of the courses cover the requirements of employers in the field of ICT, especially those in the field of systems engineering. Some of the methods applied in the discipline can be used in other areas.

10. Evaluation

Activity type	Assessment criteria	Assessment methods	Weight in the final grade	
Course	Assessment of knowledge through a test based on the knowledge gained following participation in the course	Written exam	70%	
Seminar	-	-	-	
Laboratory	Examination of the skills and knowledge acquired through the participation in the laboratory.	Practical assessment	30%	
Project	-	-	-	
Minimum standard of performance: Written exam rabk > 5 and practical assessment rank > 5				

Date of filling in:		Title Firstname NAME	Signature
30.03.2023	Course	Lecturer dr.ing. Ioan-Valentin Sita	
	Aplications	Lecturer dr.ing. Ioan-Valentin Sita	

Date of approval by the Department of Automation Council	Head of Departament Prof.dr.ing. Honoriu VĂLEAN
Date of approval by the Faculty of Automation and Computer	Dean
Science Council	Prof.dr.ing. Liviu Cristian MICLEA
