## Syllabus

#### 1. Data about the program of study

1.1 Institution	Technical University of Cluj-Napoca
1.2 Faculty	Automation and Computer Science
1.3 Departament	Automation
1.4 Field of study	Systems Engineering
1.5 Cycle of study	Bachelor of Science
1.6 Program of study/Qualification	Automation and Applied Informatics (English)
1.7 Form of education	Full time
1.8 Codul disciplinei	5.00

#### 2. Data about the subject

2.1 Subject name		Computer Programming and Programming Languages				
2.2 Course responsible/lee	cturer Lecturer dr. eng. Sanislav Teodora – teodora.sanislav@aut.utcluj.ro			)		
2.3 Teachers in charge of applications L			Lec	ecturer dr. eng. Sanislav Teodora – teodora.sanislav@aut.utcluj.ro		
2.4 Year of study	1 2.5 Semest		er	1	2.6 Assessment (E/C/V)	E
2.7 Turne of subject	DF — j	DF – fundamental, DD – in the field, DS – specialty, DC – complementary DF			DF	
2.7 Type of subject	DI – c	I – compulsory, DO – elective, Dfac – optional DI				DI

#### 3. Estimated total time

3.1 Number of hours per week	4	of which:	Course	2	Seminar	-	Laboratory	2	Project	-
3.2 Number of hours per semester	56	of which:	course	28	Seminar	-	Laboratory	28	Project	-
3.3 Individual study										
(a) Manual, lecture material and notes, bibliography								46		
(b) Supplementary study in the library, online and in the field								12		
(c) Preparation for seminars/laboratory works, homework, reports, portfolios, essays							6			
(d) Tutoring								2		
(e) Exams and tests								3		
(f) Other activities:							0			
3.4 Total hours of individual study (sum of (3.3(a)3.3(f))) 69										
3.5 Total hours per semester (3.2+3.4) 125										
3.6 Number of credit points 5										

#### 4. Pre-requisites (where appropriate)

4.1 Curriculum	N/A
4.2 Competence	Mathematics - baccalaureate level, Mathematics-Informatics profile (M1)

#### 5. Requirements (where appropriate)

5.1. For the course	Amphitheater with appropriate equipment to support an opgoing lecture
5.1. FOI the course	Amphitheater with appropriate equipment to support an ongoing lecture
	(multimedia equipment)
5.2. For the applications	The attendance at the laboratory classes is mandatory.

## 6. Specific competences

6.1 Professional competences	• C2 – Operating with fundamental concepts from Computer Science, Information and Communication Technology
	<ul> <li>C2.1 - Description of the operation and structure of computer systems, communication networks and their applications in systems engineering using knowledge of programming languages, programming environments and technologies, programming engineering and specific tools (algorithms, schemes, models, protocols, etc.).</li> </ul>
6.2 Cross competences	N/A

### 7. Course objectives

7.1 General objective	٠	Operating with fundamental concepts from computer science
7.2 Specific objectives	٠	The study of the steps necessary to solve a problem
	•	Algorithm description in a pseudocode type language
	•	The study of the C programming language
	•	Developing applications in the C programming

#### 8. Contents

Introduction. Short history. Hardware components.         Steps to solve a problem. The C programming language –         Introduction. Variables. Expressions.         Arrays. Statements.         Eventions.		Teaching methods	Notes		
Introduction. Variables. Expressions. Arrays. Statements.	2				
	2				
Eventions, Lloader files	2				
Functions. Header files.	2				
Pointers. Pointer operations.	2	Lectures, multimedia			
Structure. Union. Enumeration.	2	presentations,			
Bit fields. Functions on characters and strings. Functions from the C standard library.	2 applications written				
Files.	2				
Recursion. Functions with a variable number of arguments.	2	language			
Modular programming.	2	1			
The preprocessor. Preprocessor directives. Assembly in C.	2	1			
Some concepts of concurrent programming. Embedded systems.	2				
Syntactic and semantic errors in C.	2				
Review.	2				
P. Deitel, H. Deitel, "C - How to Program", Prentice Hall, Ed. VIII, 201

# 9. Bridging course contents with the expectations of the representatives of the community, professional associations and employers in the field

The contents of the course help the students to create the necessary bases for the further development of applications in the field of industrial informatics.

#### 10. Evaluation

Activity type	Assessment criteria	Assessment methods	Weight in the final grade		
Course	40% theoretical part, 60% applied part	Written exam onsite, online exam if the epidemiological situation requires it	60%		
Seminar	-	-	-		
Laboratory	100% applied part	Computer test onsite, online if the epidemiological situation requires it	40%		
Project	-	-	-		
Minimum standard of performance:					

• Each component of the final grade must be passed with at least grade five.

Date of filling in:		Title Firstname NAME	Signature
03.06.2024	Course	Lecturer dr. eng. Teodora SANISLAV	
	Applications	Lecturer dr. eng. Teodora SANISLAV	

Date of approval by the Department of Automation Board	Head of Departament of Automation Prof.dr.eng. Honoriu Vălean
Date of approval by the Faculty of Automation and Computer Science Council	Dean Prof.dr.eng. Mihaela Dînşoreanu
