WE INVITE YOU TO

RPA DEVELOPMENT

PRE-EMPLOYMENT TRAINING

During our pre-employment training you will learn how to:

+ Build smart software robots using UiPath Studio, one of the leading RPA platforms

+ Deploy, monitor and configure your automations on several environments

+ Work with Machine Learning models and Document Understanding

You will have 1-1 sessions with our trainers/mentors to maximize your learning.

At the end of the training, you can get certified and start to work with us as a long-term employee if we all enjoy the collaboration.

Spring edition
