

DevelopYourSkills | Internship – 2022

We are looking for passionate students willing to solve air traffic management and public safety technical challenges.

Between 11 July - 19 August, you will join us full-time as a Software Developer, Test Automation Engineer or System Engineer intern. After the completion of this paid internship, you may get a proposal for a part-time collaboration. This is based on the results obtained during the program and the available positions.

You should expect to take an online technical test at the end of March, and by the end of April, you should have our offer and make a decision.

If you want to take off in your career with a summer internship, we are looking forward to meeting you!

You will learn

- Java
- Design patterns
- Business domains

Key Qualifications

- You are currently enrolled in a Bachelor's Degree Programme (intermediary year)
- Your specialisation is in Computer Science, Automation and Computer Science, Telecommunication or equivalent
- You have excellent English skills, both written and spoken
- You are eager to work in safety-critical domains
