Paid Software Engineering Internship

At Fundmore we are sure there is a better way for people to buy their dream home. We believe that the process of borrowing and lending money is quite outdated and is a source of frustration for all the parties involved. This is why we want to change it for good.

Through technology, deep learning, automation and data science, we can build a bias-free, faster and cheaper loan adjudication platform that also removes the hustles.

As a software developer, you'll be the brain behind crafting, developing, testing, going live and maintaining the system. You are passionate in understanding the business context for features built to drive better customer experience and adoption.

Nodejs, Express, PostgreSQL, Angular, Storybook, HTML/CSS/JS, Serverless (AWS Lambdas), AWS (SQS, SNS, RDS, Comprehend, Textract, S3), GitHub

For registration, please send us your CV and a link to some of your interesting projects (optional).

Registration Deadline : May 31st, 2022
