Proudly creating game changing technology products for a wasteless, sustainable future

Winnow is a fast growing start up, developing cutting edge technology to tackle the **$1 trillion global food waste problem** by transforming the way we produce food. Established in 2013, we are currently operating in over 30 countries, and we are just at the start of our journey…

Our programme

Participating in the intern programme at Winnow isn't about taking a back seat. Our participants are bright, motivated and integral members of the global team from day one. You'll be getting involved at the heart of some of our key strategic projects and will have a voice which will be listened to.

Join us this Summer and you'll look forward to:

- A competitively paid, 3 month summer internship (starting 4th July)
- A permanent offer to join Winnow if you are successful on your internship
- The chance to work on real projects and do real work
- Working with great technology, and great technologists
- The support of a buddy in addition to a manager to support you during the programme
- Regular constructive feedback
- The opportunity to present your work to senior stakeholders and the company Founders
- Working on product with a great social mission
- Joining with a cohort of equally talented interns with regular social events planned

Our opportunities

There are opportunities in the following teams:

- Development (backend)

- QA

- Technical Support

- Dev Ops

- Data Operations

Our technology

Technology is at the forefront of what we do. Our current stack includes:

- Languages: Java, VueJS, Python, Go

- Android apps (Kotlin/Java)

- PostgreSQL, MySQL

- REST APIs

- Designing and manufacturing IoT 'smart' edge devices and expanding using Linux powered devices on the field collecting data using cutting edge technologies

- Focus on security, user authentication, permissions, data integrity

- AWS Cloud using EC2, Aurora, S3 and other services

- JIRA, Confluence, BitBucket (Atlassian products)

- Moving to a Microservices architecture using Kafka for messaging and currently implementing other patterns

- Continuous Integration and Delivery using Jenkins, SonarQube, New Relic, Docker, Terraform.

- Test Driven Development environment with focus on testing and quality output

- Agile team using Scrum or Kanban (each team chooses the best approach to drive results)

- Reporting and Analytics using Pentaho

About you

Driven and ambitious you will be excited about gaining experience in a fast paced organisation during one of the most exciting and dynamic times in our business.

Things move quickly at Winnow so you'll be able to work under pressure, get going of your own accord and use your initiative to get things done. You'll be able to work at speed without compromising on accuracy and will be able to work as part of a team.

You will work alongside a talented team who are motivated by building an exciting business and leaving the world a better place than we found it.
